Proficiency
Institute

**Technical expertise.
Responsive service.
Constant innovation.**

We're proficient at all of them.

When it comes to proficiency testing, reliability is everything. You need a provider that fully supports you with technical expertise and prompt, personal service. At API, we work with over 20,000 laboratories, covering all areas of laboratory medicine. Impressive numbers, for sure. But our reputation as a leader has grown because we are committed to providing the best customer service in the industry. We handle each contact promptly and professionally, so you don't wait for answers. Our technical experts fully understand the laboratory so they can assist you with a wide range of needs. We also provide automated result transmission, creative online services, and free Continuing Education credits.

The end result? With API, you have people and results you can rely on to meet all your proficiency testing needs.

Proficiency Testing Excellence

Ensure reliable, accurate results through regular assessments to meet your compliance needs.

World-Class Service

Access to prompt and personal technical expertise covering all areas of the clinical lab.

Comprehensive Menu

200+ programs for a range of laboratories from small clinics to large hospital systems.

Streamline Your Workflow

Save time and eliminate the #1 cause of PT failures - clerical errors - with DataDirect.

API DataDirect

ELIMINATE THE #1 CAUSE OF PROFICIENCY TESTING FAILURES, CLERICAL ERRORS!

Manual entry of proficiency testing results is a time-consuming process and prone to errors. DataDirect utilizes the ability of your LIS to run a report and create a data file which is then uploaded onto API's website. This process removes the need for manual entry, saves time, and eliminates the number one cause of proficiency testing failures, clerical errors!

The process is simple

API DataDirect is the future of proficiency testing, eliminating clerical errors in data entry to help you focus on the work that really matters.

Enrollment Information

Enrollment

1. Use this catalog to select the programs you need and record the selections on the order form. Please follow the instructions below to complete the form.

Make sure to include:

- a. Shipping Address
 - b. Billing Address (if different than shipping address)
 - c. Regulatory Information (CLIA number, CAP, TJC, or COLA, etc.)
 - d. Payment Method:
If paying by check, mail to:
American Proficiency Institute
P.O. Box 7592
Carol Stream, IL 60197-7592
2. Ensure the "TOTAL" includes the \$150 Annual Enrollment fee which covers shipping, administrative costs of setting up customer files, data processing, and reports.
 3. To Order:
 - a. Email your completed order form to CustomerService@api-pt.com
 - b. Fax the order form to us at 855-900-6119
 - c. Mail orders to:
American Proficiency Institute
P.O. Box 7592
Carol Stream, IL 60197-7592
 4. After processing your order, we will send you an "Order Confirmation" showing products ordered and pre-set shipping dates:
 - a. Mark your calendar with the shipment dates.
If your kit does not arrive by the end of that week, please contact us immediately. If you do not contact us by the posted replacement deadline to notify us that you have not received your kit, we may not be able to accommodate a replacement kit.
 - b. Inspect your kit immediately upon receipt.
Please note that while most of our samples require refrigeration upon receipt, as indicated on the box, many times there are mixed storage temperature requirements (including refrigerate, freeze, or room temperature). It is important that you inform anyone receiving the kit that they must open the kit upon arrival to determine proper storage conditions for each enclosed module. Call us within 3 days if any sample is missing or damaged to request a replacement. Please call prior to discarding any damaged samples or refusing a kit.
 - c. Read the instructions carefully before beginning a test. Some samples require special handling before testing.
 - d. Keep a copy of any result forms mailed to API.

Partial Year Orders

API makes every effort to accommodate new orders or order changes throughout the year. Except for the annual enrollment fee, we will prorate the prices for orders received after the first shipment.

Cancellations

We will credit any charges for unshipped specimens if we receive notification four weeks prior to the next shipment. In accordance with our cancellation policy, all credits expire within 120 days of the credit memo date. The annual enrollment fee is nonrefundable.

International and Non-Continental U.S. Customers

API is able to service many international locations and non-continental U.S. customers. Some locations, including the state of Hawaii, U.S. territories and commonwealths, as well as international locations, may require import permits for API shipments. Local authorities can assist you in determining if any permits are required for your location. Please note: It is the responsibility of the testing facility to obtain any required import permits.

Additional shipping charges for international and non-continental U.S. locations may apply. Please contact Customer Service at GlobalCustomerService@api-pt.com for more information.

Program Highlights

API Proficiency Testing Programs are CAP Accepted!

We are pleased to report that the College of American Pathologists continues to accept proficiency testing programs from the American Proficiency Institute. This means CAP accredited laboratories can use API's proficiency testing programs except where indicated by a solid black triangle (▴) next to an analyte. Please refer to the index on pages 130 through 135 for a complete listing of CAP accepted analytes. API programs are also accepted by CMS, COLA, TJC, and state regulatory agencies including New York state.

API is ISO Accredited!

We are proud to be accredited as a proficiency testing provider to the requirements of ISO/IEC 17043:2010. We are accredited by the American Association for Laboratory Accreditation (A2LA) under certificate number 3094.01 (www.A2LA.org). A2LA is a signatory to the ILAC Mutual Recognition Arrangement (MRA) which provides global recognition of PT accreditations. Programs included under the scope of this accreditation are marked with a ✓ in this catalog.* Evaluations for accredited analytes can be used by ISO 15189-accredited laboratories to fulfill PT requirements.

**Printed versions of the catalog may not have the most current scope of information; please see online catalog for current status.*

Track Proficiency Performance using API DataDashboard

With API's DataDashboard, laboratories or those managing groups of laboratories can quickly and easily view proficiency testing performance over the most recent six test events. The dashboard includes trend data by analyte, percentage of acceptable results compared to all API labs, failure count by test event, and analytes with unsatisfactory performance. Another option allows you to download spreadsheets of PT performance data. Customers can log in to their API Paperless PT account to access their dashboard. Contact us at TechSupport@api-pt.com or call us if you need assistance.

Automated Proficiency Results with API DataDirect

Using their laboratory information system (LIS) or middleware, laboratories may now upload proficiency testing results directly to API, a process that revolutionizes proficiency testing for clinical laboratories. No more manual data entry, no more clerical errors, no new technology systems to purchase, and no additional fees! DataDirect is easy to use and saves time! Contact us at DataDirect@api-pt.com or call us for a demonstration and free Test Drive.

If you have any questions or need assistance with ordering, please email CustomerService@api-pt.com or call us at 800-333-0958.

138 Ammonia ✓

A38 Ammonia - Verification Program

Analytes

Ammonia

Format

3 samples x 2 shipments

Chemistry Miscellaneous Shipments

April 14-15, October 6-7

Amniotic Fluid pH

Program Description

0.5 mL simulated amniotic fluid - For Nitrazine methods.

166 Amniotic Fluid pH ✓

Analytes

pH (interpretation)

pH (nitrazine)

Format

3 samples x 2 shipments

Chemistry Miscellaneous Shipments

April 14-15, October 6-7

All analytes in **bold** type are regulated for proficiency testing by CMS. Laboratories enrolling in programs to satisfy CMS requirements for PT are responsible for ensuring they are testing five samples, three times per year.

► Analyte is not CAP accepted. ✓ Program is included in our A2LA scope of accreditation. See A2LA link on our website for analyte exceptions.

Anti-epileptic Drugs

Chemistry Miscellaneous Shipments

April 14-15, October 6-7

Apolipoproteins

Program Description

1 mL serum

130 Apolipoproteins

Analytes

Apolipoprotein A1

Apolipoprotein B

Lipoprotein (a)

Format

3 samples x 2 shipments

Chemistry Miscellaneous Shipments

April 14-15, October 6-7

B-Ketone

Program Description

1 mL liquid - For quantitative Beta-hydroxybutyrate testing performed on chemistry analyzers or whole blood glucometers. For qualitative testing using Bayer Acetest, see #137 - Alcohol on page 11.

174 B-Ketone ✓

Analytes

Beta-hydroxybutyrate

Format

3 samples x 2 shipments

Chemistry Miscellaneous Shipments

April 14-15, October 6-7

All analytes in **bold** type are regulated for proficiency testing by CMS. Laboratories enrolling in programs to satisfy CMS requirements for PT are responsible for ensuring they are testing five samples, three times per year.

► Analyte is not CAP accepted. ✓ Program is included in our A2LA scope of accreditation. See A2LA link on our website for analyte exceptions.

POC Glucose A

Program Description

1 mL liquid - For waived blood glucose meters. Per CMS, only one set of proficiency results may be reported. Laboratories using more than one meter should also enroll in X23, A23, X18, or J18. For True Metrix and True Metrix Pro, see #979 - POC Glucose B.

5 samples

- 123 POC Glucose A ✓
- 192 POC Glucose A - Additional Volume - Add on to #123
- A23 POC Glucose A - Verification Program - report up to 20 results
- X23 POC Glucose A - Extra Results Verification Program - use #123 samples to report results for up to 20 additional meters

3 samples

- 918 POC Glucose A ✓
- 992 POC Glucose A - Additional Volume - add on to #918
- J18 POC Glucose A - Verification Program - report up to 20 results

BLOOD CELL IDENTIFICATION

2025 CLIA Hematology Update

Beginning January 1, 2025, scores are required to be reported to CMS for both Blood Cell Identification and White Blood Cell Differential by automated methods. Laboratories no longer need to make a choice of which score to report to CMS; API will automatically report all scores for analytes in bold print. If you are also enrolled with another provider and are enrolling with API for additional testing, please contact Technical Support at 800-333-0958 or TechSupport@api-pt.com.

Blood Cell Identification

Program Description

Two Wright stained peripheral blood smears for blood cell identification. One case study will include 5 annotated cells/objects for identification and will be scored for CMS. The second case study is educational and will include 5 cells/objects for identification with a manual 100 WBC differential and platelet estimate. #224 is a virtual program and does not include printed photographs. To receive printed photographs, order #286. Please Note: Laboratories ordering only virtual programs must access paperwork and images online. For competency, see Q24 - Blood Cell Identification - Competency on page 129.

Microbiology PT Requirements

CLIA requires laboratories performing microbiology tests that are regulated for proficiency testing to test five regulated challenges per test event in each sub-specialty where regulated testing is performed. The five subspecialties are Bacteriology, Mycobacteriology, Mycology, Parasitology, and Virology.

As part of this requirement, the PT results reported by laboratories must reflect the extent of testing performed on patient samples. Laboratories are instructed to report results for microorganism detection or identification to the highest level that they report on patient specimens, to ensure their PT is as specific as results reported on patients.

All non-waived tests in a sub-specialty can be combined to meet the five-challenge requirement. Regulated tests are indicated in bold type.

Challenges tested with waived methods (e.g., Rapid Group A Strep) cannot be included in the five regulated challenges. Furthermore, if one of your methods becomes waived or you change to a waived method mid-year, you are responsible for ensuring you maintain five challenges per test event for the remaining non-waived tests in that sub-specialty.

Programs listed that have fewer than five samples are to be used as add-on options to other programs in the same sub-specialty.

Each sample tested for antimicrobial susceptibility counts as one challenge regardless of the number of drugs reported.

Urine colony count is not a regulated test and cannot be included as one of the five challenges.

COMPETENCY

One of the top citations that laboratories receive during an inspection is the lack of competency documentation. API can help!

Our Competency Programs provide tools to assist with evaluating and documenting the competency of testing personnel.

These tools can be utilized in conjunction with the laboratory's established standards to meet the required elements of competency.

**IDENTIFY QUALITY
IMPROVEMENT
OPPORTUNITIES**

**ASSESS
WORKFORCE
DEVELOPMENT NEEDS**

**DEMONSTRATE
RELIABLE
PATIENT TESTING**

PROGRAMS INCLUDE:

- Sample(s) to test up to ten personnel
- Expected result/peer group acceptable range
- Direct observation checklist
- Problem solving assessment quiz
- Frequent ship dates available to help laboratories stay up to date with competency assessments

CE Credits, Automated Results, and Other Products and Services

Free Continuing Education Credits

Physicians, medical laboratory scientists, and medical laboratory technicians enrolled with API are eligible to earn FREE continuing education credit through online self-assessment activities offered in conjunction with the American Society for Clinical Pathology (ASCP). The number of credits that can be earned depends on individual participation. For more information, go to our website at api-pt.com and select “Learn More” under the Continuing Education heading, or call us at 800-333-0958 to speak with a Customer Service Representative.

API DataDirect

Using their own laboratory information system (LIS) or middleware, laboratories may now transmit proficiency testing results directly to API, a process that revolutionizes proficiency testing for clinical laboratories. No more manual data entry, no more clerical errors, no new technology systems to purchase, and no additional fees! DataDirect is easy to use and saves time! Contact us at DataDirect@api-pt.com or call us for a demonstration.

Remedial Proficiency Testing

Remedial proficiency testing is a service API offers to those who need to test specimens in addition to regular proficiency testing. This is usually required when a laboratory has had poor performance on a particular analyte in two of three test events. If your laboratory encounters a need for this service (which includes a written performance evaluation), call to speak with a Technical Specialist for more details. Remedial evaluations are not included in our A2LA scope of accreditation.

Troubleshooting Samples

Occasionally, laboratories wish to re-test a proficiency testing sample as part of a corrective action plan. Most API samples are available for this purpose at a nominal charge. Our Technical Specialists can give you further information.

Verification Programs for Multiple Instruments

CLIA regulations state that if a laboratory uses multiple methods to test an analyte they must designate one instrument/method as primary for the proficiency event and test the PT samples using that instrument/method. Laboratories are not to test proficiency samples during the PT event with more than one instrument unless that is how they test all patient specimens. This restriction also applies to non-regulated analytes and to analytes categorized as waived under CLIA.

Laboratories may test proficiency samples with multiple instruments/methods after the PT due date. API's Verification programs offer the convenience of using proficiency samples and statistics to verify secondary instruments and methods, while remaining compliant with CLIA regulations. Verification samples are shipped along with PT samples. Laboratories are directed to test after the PT due date and submit results for verification samples online. Verification evaluations are available online, when the evaluations for proficiency programs are released.

Where available, Verification programs are listed in the main body of the catalog along with regular PT programs. Scores from Verification programs are not reported to regulatory agencies such as CMS, CAP, or The Joint Commission. Verification programs are not included in our A2LA scope of accreditation.

Outstanding Online Features and Services

Paperless Proficiency Testing has unique features that can help you manage your proficiency testing more efficiently. Visit www.api-pt.com to learn more!

- Email is sent with shipping dates, package tracking information, and when your evaluation is ready.
- Submit, review, and print results online.
- DataDashboard trends performance over the most recent six test events.
- Free Continuing Education credits.
- Management reports for multiple labs.
