

Purchasing Instructions

Depending on your organization's processes, you may be required to obtain a Purchase Order Number (PO) for all purchases from an outside vendor. Below, you'll find some helpful hints on how to request the right type of PO from your Purchasing Department. We've also included a summary of what proficiency testing is and how it works which may assist in the purchasing process.

General Information

- API's invoice terms are NET 30.
- PO# Requirement:
 - If your organization requires a PO# for the purchase of goods and services, we must have the PO# at the time of order placement.
 - The Annual Enrollment Fee should be included as a line item on the purchase order. If not included, it will be added to the invoice for payment.
 - If a PO# is not required, we will accept verbal authorization or credit card payments (Visa, MasterCard, or Discover).

Purchase Order Types

- Recommended PO Types:
 - PRE-PAYMENT PO or SERVICE PO: These types are recommended for ordering proficiency testing. They typically allow your Accounts Payable Department to send payment once the invoice is received.
- Traditional POs:
 - We accept traditional POs, but payment must adhere to our invoice terms (NET 30).
 - Traditional POs often require all products to be marked as received before the invoice is released for payment. Given that proficiency testing (PT) is shipped throughout the year, this can result in delayed payments.
- Adding PT Items Mid-Year:
 - Depending on your organization's process, you may need a new PO# to add a PT item mid-year. If the original PO is considered "closed," it may not be usable for additional orders. Please check with your Purchasing Department for guidance.

Brief Summary on Proficiency Testing

Clinical laboratories must have a CLIA License, granted by the Centers for Medicare & Medicaid Services (CMS), to perform in-house patient testing. To maintain compliance with CLIA regulations, laboratories must participate in proficiency testing from a CMS-approved provider.

How Proficiency Testing (PT) Works:

- CLIA regulations require laboratories to enroll in proficiency testing for a year at a time.
- Proficiency testing is an annual subscription, paid in advance to ensure sample availability for the full year.
- PT providers send simulated patient samples to the participating laboratories on a set schedule throughout the year.
