# Technical expertise. Responsive service. Constant innovation.

# We're proficient at all of them.

When it comes to proficiency testing, reliability is everything. You need a provider that fully supports you with technical expertise and prompt, personal service. At API, we work with over 20,000 laboratories, covering all areas of laboratory medicine. Impressive numbers, for sure. But our reputation as a leader has grown because we are committed to providing the best customer service in the industry. We handle each contact promptly and professionally, so you don't wait for answers. Our technical experts fully understand the laboratory so they can assist you with a wide range of needs. We also provide automated result transmission, creative online services, and free Continuing Education credits.

The end result? With API, you have people and results you can rely on to meet all your proficiency testing needs.

# Upload your proficiency testing results without an interface!

- Quantitative & Qualitative results
- Automated mapping of test names
- No middleware or software installation
- No additional cost it's free!

Over 5 million results have been successfully uploaded using this revolutionary technology!

# The process is simple:

Order and complete testing Export PT data & save in a file Upload the file to API

Review & submit results

DataDirect utilizes the ability of your LIS to run a report and create a data file which is uploaded on API's website.

- 1. Use this catalog to select the programs you need and record the selections on the order form. Please follow the instructions below to complete the form. Make sure to include:
  - a. Shipping Address
  - b. Billing Address (if different than shipping address)
  - c. Regulatory Information (CLIA number, CAP, TJC, or COLA, etc. )
  - d. Payment Method: If paying by check, mail to: American Proficiency Institute Department 9526 P.O. Box 30516 Lansing, MI 48909-8016
- 2. Ensure the "TOTAL" includes the \$125 Annual Enrollment fee which covers shipping, administrative costs of setting up customer files, data processing, and reports.

#### 3. To Order:

- a. Email your order to CustomerService@api-pt.com
- b. Fax the order form to us at 855-900-6119
- c. Call us at 800-333-0958 and speak with a Customer Service Representative
- d. Mail orders to: American Proficiency Institute Department 9526 P.O. Box 30516 Lansing, MI 48909-8016
- 4. After processing your order, we will send you an "Order Confirmation" showing products ordered and pre-set shipping dates:
  - a. Mark your calendar with the shipment dates. If your kit does not arrive within 3 business days after the shipment date, call us so we can track the kit or issue a replacement.
  - b. Inspect your kit immediately upon receipt. Call us within 3 days if any sample is missing or damaged to request a replacement. Please call prior to discarding any damaged samples or refusing a kit.
  - c. Read the instructions carefully before beginning a test. Some samples require special handling before testing.
  - d. Keep a copy of any result forms mailed to API.

# **Partial Year Orders**

API makes every effort to accommodate new orders or order changes throughout the year. Except for the annual enrollment fee, we will prorate the prices for orders received after the first shipment.

# Cancellations

We will credit any charges for unshipped specimens if we receive notification four weeks prior to the next shipment. In accordance with our cancellation policy, all credits expire within 120 days of the credit memo date. The annual enrollment fee is nonrefundable.

# International and Non-Continental U.S. Customers

API is able to service many international locations and non-continental U.S. customers. Some locations, including the state of Hawaii, U.S. territories and commonwealths, as well as international locations, may require import permits for API shipments. Local authorities can assist you in determining if any permits are required for your location. *Please note: It is the responsibility of the testing facility to obtain any required import permits.* 

Additional shipping charges for international and noncontinental U.S. locations may apply. Please contact Customer Service at CustomerService@api-pt.com for more information.

# 2023 Highlights

# **API Proficiency Testing Programs are CAP Accepted!**

We are pleased to report that the College of American Pathologists continues to accept proficiency testing programs from the American Proficiency Institute. This means CAP accredited laboratories can use API's proficiency testing programs. Please refer to the index on pages 138 through 143 for a complete listing of CAP accepted analytes. API programs are also accepted by CMS, COLA, TJC, and state regulatory agencies including New York state.

# **API is ISO Accredited!**

We are proud to be accredited as a proficiency testing provider to the requirements of ISO/IEC 17043:2010. We are accredited by the American Association for Laboratory Accreditation (A2LA) under certificate number 3094.01 (www.A2LA.org). A2LA is a signatory to the ILAC Mutual Recognition Arrangement (MRA) which provides global recognition of PT accreditations. Programs included under the scope of this accreditation are marked with a  $\checkmark$  in this catalog.\* Evaluations for accredited analytes can be used by ISO 15189-accredited laboratories to fulfill PT requirements.

\*Printed versions of the catalog may not have the most current scope information; please see online catalog for current status.

# Track Proficiency Performance using API DataDashboard

With API's DataDashboard, laboratories can quickly and easily view proficiency testing performance over the most recent six test events. The dashboard includes trend data by analyte, percentage of acceptable results compared to all API labs, failure count by test event, and analytes with unsatisfactory performance. Customers can log in to their API Paperless PT account to access their dashboard. Contact us at TechSupport@api-pt.com or call us if you need assistance.

# Automated Proficiency Results with API DataDirect

Using their laboratory information system (LIS) or middleware, laboratories may now transmit proficiency testing results directly to API, a process that revolutionizes proficiency testing for clinical laboratories. No more manual data entry, no more clerical errors, no new technology systems to purchase, and no additional fees! DataDirect is easy to use and saves time! Contact us at DataDirect@api-pt.com or call us for a demonstration and free Test Drive.

# **BLOOD CELL IDENTIFICATION**

# For laboratories that perform both Blood Cell Identification and Automated Differentials:

CMS allows for the transmission of only one of these scores each test event. Results for both tests are graded and will appear on your evaluation, but only one score can be sent to CMS. If you would like your score for Blood Cell ID to be sent to CMS, enroll in #224 or #286. If you would like your score for auto differential to be sent to CMS, enroll in #225 or #291.

# **Blood Cell Identification**

# **Program Description**

Two Wright stained peripheral blood smears for blood cell identification. One case study will include 5 annotated cells/objects for identification and will be scored. The second case study is educational and will include 5 cells/objects for identification with a manual 100 WBC differential and platelet estimate. #224 and #225 are virtual programs and do not include printed photographs. To receive printed photographs, order #286 or #291. Please Note: Laboratories ordering only virtual programs must access paperwork and images online. # **Microbiology Enrollment Requirements**

CLIA requires laboratories performing microbiology tests that are regulated for proficiency testing to test five regulated challenges per test event in each sub-specialty where regulated testing is performed. The five subspecialties are Bacteriology, Mycobacteriology, Mycology, Parasitology, and Virology. All non-waived tests in a subspecialty can be combined to meet the five-challenge requirement. For molecular testing of direct specimens, CMS considers only bacteriology, virology, and yeast in blood cultures to be regulated tests. Regulated tests are indicated in bold type.

Challenges tested with waived methods (e.g., Rapid Group A Strep) cannot be included in the five regulated challenges. Furthermore, if one of your methods becomes waived or you change to a waived method mid-year, you are responsible for ensuring you maintain five challenges per test event for the remaining non-waived tests in that sub-specialty.

Programs listed that have fewer than five samples are to be used as add-on options to other programs in the same sub-specialty.

Susceptibility testing counts as one challenge regardless of the number of drugs reported.

Urine colony count is not a regulated test and cannot be included as one of the five challenges.

For assistance, please contact Technical Support at 800-333-0958 or TechSupport@api-pt.com.

# **MOLECULAR MULTIPLEX PROGRAMS**

For molecular testing of direct specimens, CMS considers bacteriology, virology, and yeast in blood cultures to be regulated tests. If the only regulated bacteriology, virology or mycology testing you perform is using a multiplex analyzer, you are required to participate in five challenges, three times a year for compliance with CLIA. Technical Support is available at 800-333-0958.

# Anti-CCP

#### **Program Description**

1 mL serum - For qualitative, quantitative, and semi-quantitative testing.

#### **Program Information**

423 Anti-CCP✓

#### Analytes

Anti-Cyclic Citrullinated Peptide

✓ Program is included in our A2LA scope of accreditation.

Format

2 samples x 3 shipments

Shipping Dates Mar. 27, Aug. 7, Nov. 27

## ASO

#### **Program Description**

1 mL serum - For qualitative, quantitative, and semi-quantitative (titer) methods. Qualitative and titer testing are scored for CMS.

#### **Program Information**

424 ASO✓

#### **Analytes**

#### **Anti-Streptolysin O**

✓ Program is included in our A2LA scope of accreditation.

#### Format

5 samples x 3 shipments

Shipping Dates Mar. 27, Aug. 7, Nov. 27

# **C-Reactive Protein**

#### **Program Description**

0.5 mL serum - For qualitative and quantitative CRP procedures that measure levels >1.0 mg/dL.

#### **Program Information**

431 C-Reactive Protein ✓

#### **Analytes**

**C-Reactive Protein** 

✓ Program is included in our A2LA scope of accreditation.

#### Format

# COMPETENCY

#### Innovative Solutions.

Technical Excellence.

# **Competency Offerings Now Available**

One of the top citations that laboratories receive during an inspection is the lack of competency assessment documentation. API can help laboratories meet this requirement. Our new Competency Programs provide tools to assist with evaluating and documenting the competency of testing personnel. These tools can be utilized in conjunction with the laboratory's established standards to meet the required elements of competency.

Included in Competency Programs:

- Frequent ship dates available to help laboratories stay up to date with competency assessments
- Observation checklists and quizzes to help laboratories ensure they have appropriate documentation to meet the required six elements of competency
- Samples with peer group data comparisons for direct observation of multiple personnel to ensure all members of the laboratory team can demonstrate accurate and reliable patient testing

Let API's Competency Programs provide a pathway for your laboratory to identify quality improvement opportunities, assess workforce development needs, and demonstrate reliable patient testing.

# CE Credits, Automated Results, and Other Products and Services

# **Free Continuing Education Credits**

Physicians, medical technologists, and technicians enrolled with API are eligible to earn FREE continuing education credit through online self-assessment activities offered in conjunction with the American Society for Clinical Pathology (ASCP). The number of credits that can be earned depends on individual participation. For more information, go to our website at api-pt.com and select "Learn More" under the Continuing Education heading, or call us at 800-333-0958 to speak with a Customer Service Representative.

# **API DataDirect**

Using their own laboratory information system (LIS) or middleware, laboratories may now transmit proficiency testing results directly to API, a process that revolutionizes proficiency testing for clinical laboratories. No more manual data entry, no more clerical errors, no new technology systems to purchase, and no additional fees! Data-Direct is easy to use and saves time! Contact us at DataDirect@api-pt.com or call us for a demonstration.

# **Remedial Proficiency Testing**

Remedial proficiency testing is a service API offers to those who need to test specimens in addition to regular proficiency testing. This is usually required when a laboratory has had poor performance on a particular analyte in two of three test events. If your laboratory encounters a need for this service (which includes a written performance evaluation), call to speak with a Technical Specialist for more details. Remedial evaluations are not included in our A2LA scope of accreditation.

# **Troubleshooting Samples**

Occasionally, laboratories wish to re-test a proficiency testing sample as part of a corrective action plan. Most API samples are available for this purpose at a nominal charge. Our Technical Specialists can give you further information.

# **Supplemental Products**

# Verification Programs for Multiple Instruments

CLIA regulations state that if a laboratory uses multiple methods to test an analyte they must designate one instrument/method as primary for the proficiency event and test the PT samples using that instrument/method. Laboratories are not to test proficiency samples during the PT event with more than one instrument unless that is how they test all patient specimens. This restriction also applies to non-regulated analytes and to analytes categorized as waived under CLIA.

Laboratories may test proficiency samples with multiple instruments/methods after the PT due date. API's Verification programs offer the convenience of using proficiency samples and statistics to verify secondary instruments and methods, while remaining compliant with CLIA regulations. Verification samples are shipped along with PT samples. Laboratories are directed to test after the PT due date and submit results for verification samples online. Verification evaluations are available online, when the evaluations for proficiency programs are released.

Where available, verification programs are listed in the main body of the catalog along with regular PT programs. Scores from verification programs are not reported to regulatory agencies such as CMS, CAP, or The Joint Commission. Verification programs are not included in our A2LA scope of accreditation.

# Outstanding Online Features and Services

Paperless Proficiency Testing has unique features that can help you manage your proficiency testing more efficiently. Visit www.api-pt.com to learn more!

- Email is sent with shipping dates, package tracking information, and when your evaluation is ready.
- Submit, review, and print results online.
- DataDashboard trends performance over the most recent six test events.
- Free Continuing Education credits.

# API puts your laboratory first. Why?

Because your test results are critical to patient care, and your confidence in their accuracy underpins all that you do.

API DataDirect is the future of proficiency testing, eliminating clerical errors in data entry to help you focus on the work that really matters.

- No middleware or software installation
- Automated mapping of test names
- Quantitative & Qualitative results
- No additional cost it's free!
